Description of Specialties3rd Cover	Page.

LEWIS ROESCH, FREDONIA, N. Y.,

Propagator of Grape Vines and Berry Plants.

Please do not mistake our identity. We have supplied Grape Vines and Small Fruits to most of the older nurseries for thirty-two years. This season we have as fine a stock of Vines and Plants as we ever grew, and a much larger assortment, hence the necessity of change and increase of our price list.

YOUR WANT LIST

is solicited. Kindly make it definite by stating varieties wanted, how many of each as well as age and grade in order that we can give you definite quotations.

WANTED FOR FALL DELIVERY.

A general line of Fruit and Ornamental Trees, Roses, Etc., in exchange for Gooseberries, Currants, Etc., this Spring.

TO THE TRADE

Since 1880, we have made the propagation of Grape Vines, Currants and Gooseberries our Great Specialty and they have become very popular wherever this stock is planted or dealt in, owing to their being unusually well endowed with a mass of fibrous roots.

We have also found that our soil and climate produces equally well rooted **Shrubbery** and **Perennials**. We now grow these too in large quantities with equal success, and we ask for them also your favorable Consideration and patronage.

Guarantee. Our stock is guaranteed to be hearthy, pure, true to name and of size and quality represented. Should errors occur, we agree, upon receipt of proper proof, to replace the same with the true variety, or else refund the money received for them, but in no case are we to be liable for a greater amount than we received for the same

Orders are subject to injury or loss of stock by hail, fire, flood or other causes beyond our control.

The Packing is done in the best manner and as lightly as is consistent with safety, for which no charge is made, except for trees in lots of less than 150.

No Substituting. We do not substitute one variety for another unless so directed, but we reserve the right, when not instructed to the contrary, to fill orders for one year stock, with stock two years old, and for two year stock, with stock one year old, of the same size. Size of stock governs the price, not age.

Shipping Facilities. Our Grape Vines and a part of the Small Fruits, Shrubbery and Trees are stored during the winter in our mammoth cellar of over 55,000 cubic feet capacity, especially built for the purpose and can be shipped by mail and express any time between Oct. 15th to May 15th. Large lots, we can also pack so as to carry safely by freight during the winter months.

Shipping Directions should accompany all orders. When none are given, we exercise our best judgment, but assume no responsibility.

Transportation Facilities. Being located on the New York Central R. R. and within three miles of the Penna., Erie, and Nickel Plate R. R's., we have unusual facilities for direct shipping to all parts of the country.

Samples. To parties desiring to purchase by the 100 or more and wishing to see samples first, we will send them at 100 rates by express, or by mail when the postage is added.

A Certificate of State Inspection will be attached to every car, box or bale.

Fumigation. Shipments to states whose laws require it, we will fumigate with hydrocyanic acid gas of customary strength.

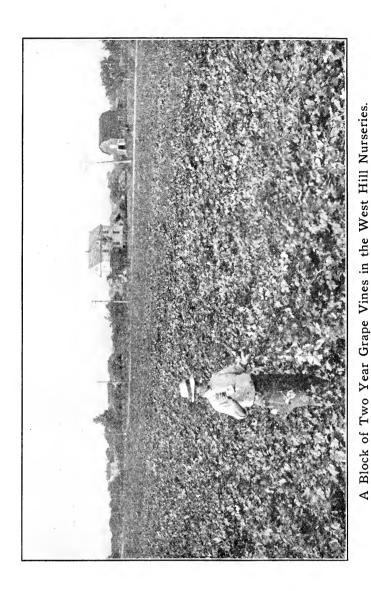

Claims of any kind must be made within five days after receipt of goods.

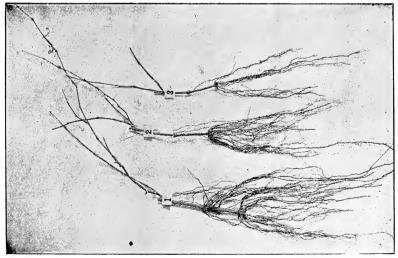

Terms Cash with order. From parties enjoying an ample mercantile rating, or who furnish satisfactory bank references, we will accept payments June 1st, \$5.00 worth or more sent C. O. D. by express or freight if desired, provided at least one-quarter of amount accompanies the order.

Our References Are:—The Mercantile Agencies; the Citizens' Trust Company and The National Bank, both at Fredonia, N. Y.

Telephone. We have the long distance telephone in our office.

Telegraph. Use Nurserymans code.

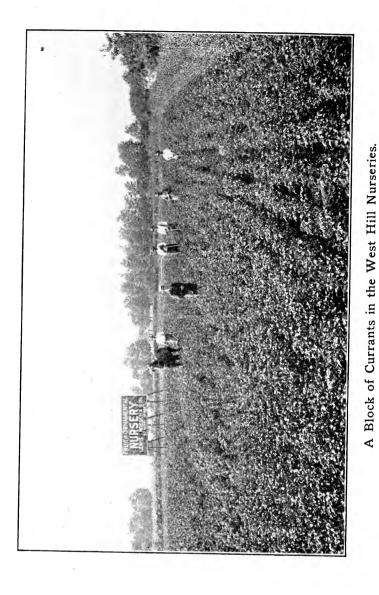

1 Represents a 2-year No. 1 Grape Vine; 2, a 1-year No. 1, and 3, a 1-year No. 2 Vine.

THE NEW EXTRA EARLY BLACK GRAPE

Early Daisy

The Earliest Grape Known

The Early Daisy ripens a week before Moore's Early, Champion or any other extra early variety and is as hardy, healthy, robust and productive as any. In quality it is better than most, while its shipping qualities are unsurpassed by any other grape. It has never been known to mildew or winter kill. It always yields a full crop, and no matter how heavy a load of fruit it bears it is sure to develop it to perfection. Early Daisv is of medium size in both bunch and berry and very compact, reminding one of the Telegraph, although different in shape, its bunches being long rather than round. Its berries never crack or drop from the cluster. While not high flavored like some varieties having foreign blood in them, it is good and sweet soon as fully colored, not foxy. Its worst fault is that, like all our purely native early grapes, its flesh is somewhat pulpy, although no more so than that of Moore's Early if indeed as much. Desirable anywhere for both dimestic use and market. Indispensable for cold sections having short season.

THE LUCILE

The Coming Red Market Grape

The Lucile ripens between Moore's early and Worden, just in time to pack with Diamond and Worden; an excellent trio of our National colors—red, white and blue.

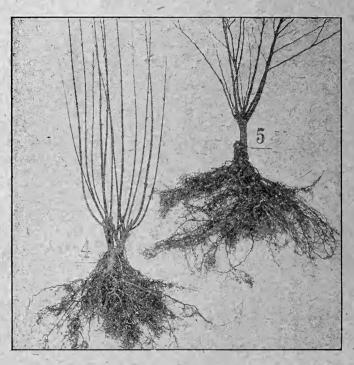

The LUCILE is sweet, and in quality compares favorably with that of Wyoming Red, which it also resembles in color. But its crowning glory is the size and compactness of its clusters which resemble those of Diamond and Pocklington, but even larger. While it is an excellent market grape anywhere, it is indispensable at the extreme North where only early and extra hardy varieties succeed.

The LUCILE yields as much or more than Concord, Niagara or any other well known market grape. Hardy and healthy as any grape, and much more so than Niagara. A strong, robust grower and ripens its wood to the tip under a load of fruit, under which the Niagara would not ripen one-half.

The LUCILE never drops its berries, but where the season is long enough it gradually dries up into raisins on the vines.

What the New York State Agricultural Experiment Station at Geneva, N. Y., says for the Lucile:

"LUCILE is of interest and value because of its truly remarkable vine characters. In vigor, health, hardiness and productiveness it is not surpassed by any of the cultivated native grapes. It is probably a seedling of Wyoming but the vine is much more vigorous than even that variety, which is considered a very strong grower. Yet with all of its great growth Lucile ripens its wood almost perfectly. It is very productive, as much so as any other of our native grapes, often bearing four bunches to the shoot, its crop exceeding those of Concord. It has never been known to winterkill in the grape regions of New York and is probably as hardy as any other of our Labruscas. Its fruit and foliage are very nearly immune to the fungal diseases of the grape."
